

Company Overview

Elevation Technology Group is a Colorado-based managed services and cybersecurity firm specializing in secure IT operations for federal contractors, regulated businesses, and growth-focused organizations. We deliver high-trust technology management, compliance readiness, and security-first infrastructure solutions that help clients operate confidently in demanding regulatory environments. Our team combines deep managed services expertise with real-world compliance execution, enabling clients to modernize operations while maintaining security, reliability, and audit readiness.

Core Competencies

- Managed IT Services (Fully Outsourced IT)
- Microsoft 365 Architecture & Administration
- Cybersecurity Operations & Monitoring
- Endpoint Detection & Response (EDR/XDR)
- Secure Identity & Access Management (Entra ID / Conditional Access)
- Cloud Infrastructure Management (Azure-focused)
- Backup, Disaster Recovery & Business Continuity
- Network Security & Remote Workforce Enablement

Compliance & Regulatory Services

- CMMC Readiness & Ongoing Support
- NIST 800-171 Alignment
- Secure Environment Hardening for CUI Workloads
- Policy & Documentation Development
- Evidence Collection & Audit Preparation
- Secure Tenant Architecture for Federal Contractors

Differentiators

Federal Contractor Expertise: We specialize in supporting organizations operating within the federal supply chain, with practical experience preparing environments for evolving compliance mandates.

Security-First Managed Services: Security is embedded into every layer of our managed services model — not sold as an add-on. Our baseline includes identity protection, endpoint monitoring, and modern security controls aligned with current best practices.

Compliance-Informed Operations: Unlike traditional MSPs, our operational model is built to support auditability, documentation, and structured governance required for regulated environments.

Right-Sized, High-Touch Delivery: We provide enterprise-grade capability with boutique responsiveness, ensuring clients receive strategic guidance alongside day-to-day operational excellence.

Typical Client Profile

- Federal contractors and subcontractors
- Engineering and technical services firms
- Manufacturing organizations supporting defense supply chains
- Professional services firms with regulatory exposure
- Growth-stage companies requiring mature IT governance
